# THE SOUL SHAKING ENERGY OF THE WADAIKO

The drum has been with us since ancient times—used in celebrations, battle, and for comforting the souls of the departed. An example of this type of drum are the traditional Japanese “Taiko”. There are many different types of Taiko that are used to this day in cultural arts such as Kabuki and Noh theater, and in ceremonies at shrines and temples. In our quest to design the perfect Rock drum, we looked at many types of Taiko and found that the characteristics of the “Wadaiko” fit perfectly with Rock Music. The Wadaiko is a large drum that consists of a shell that is carved and hollowed out from the trunk of a very large tree then fitted with a head of cowhide, tightly stretched over the open ends of the shell and held firmly in place with rows of large, decorative tacks. Its sound is massive and resonates throughout the listener’s body, going so deep as to shake the listener’s soul. Using shells of oak, Yamaha Oak Series Drums harness the sound and the energy of the Wadaiko, producing a tone that is powerful, and emotional as well. Give your audience a soul shaking experience with Yamaha Oak Series Drums.

## OAK LUGS

Oak custom drums feature newly designed lugs with small footprints and single-bolt attachment that minimize surface contact and maximize shell resonance and sustain. A nylon insert holds tension rods in place under heavy play.

## BASS DRUM LEGS

Holding these powerful drums in place are our Absolute series bass drum legs. Large pipes are Yamaha engineered for greater durability and stability. Spurs slide in and out with a handy knob that also shows spur position at a glance, and a standard drum key locks spurs and height adjustment in place.

## SNARE DRUMS

**NSD085A**  
MSB: Musashi Black

**Size:** 14"x5 1/2"  
**Shell:** 100% Oak 6-ply  
**Hoop:** DynaHoop (2.3mm triple flange steel ) with 10 holes
