

Lyve Tracker

With fine craftsmanship in cooperation with Yamaha Commercial Audio Systems, ADK Pro Audio has designed and developed Lyve Tracker — a custom rack-mounted recording system. Built strong and sturdy, Lyve Tracker is perfect for live recording in any environment. With your choice of I/O, this versatile recorder is compatible with Steinberg's Nuendo 4 or Cubase 5 and offers a Pro Tools compatible file format. Removable hard drive trays and a DVD-RW provide backup and archiving capabilities.

Product Descriptions
